

Tuesday, 23 January 2018

GroupMe (16:49:49): Shawn W added Ian Kelly, Yaqoob , Parshav , Austin , and Mohammed to the group.

Yaqoob (16:50:33): We are ready

Thursday, 25 January 2018

Ian Kelly (11:59:33): Hey guys my alternator gave out on my car. I'm currently getting it replaced. I may be unable to make it to class today just to warn you

Shawn W (15:01:05): Thanks for the warning. I've got a dental appt at 3:50 so I'll be out as well. They were hoping to get me in earlier but that's a no go. Today if everyone could send me their class schedules as well as specs for any computers you'll be using for this project. Thanks!!

Austin (15:13:33): Thursday 4:00-8:30pm, i have a macbook air and a desktop with windows 10

Austin (15:14:26): so were gonna be short 2, do we bother coming in?

Shawn W (15:14:58): One person should just to make sure he doesn't have anything for us.

Austin (15:17:52): i have a class at 5:30 anyways, i'd hate to sit in there and do nothing tho

Austin (15:27:33): im goin in

Mohammed (15:33:47): I have long day today, I finish at 8:10 pm. We can set up time that works for everyone.

Parshav (15:37:48): @Shawn W by class schedule, do you mean what schedule we're going to use for working on capstone?

Parshav (15:39:40): also, Macbook air, late 2012.

Yaqoob (15:41:37): I will be using MacBook Air.

Shawn W (15:49:47): Both when you plan to be free to work on the Capstone and when you have other classes that you must attend.

Austin (16:02:50): i only have a class after capstone thurs and a wednesday @ 5:30

Yaqoob (16:04:53): I only have the capstone class during this semester so I'm free most of the time, but I prefer to work on it at home.

Parshav (16:11:44): I'm free on the weekends to meet apart from just class time.

Austin (16:22:16): im down whenever during the week and most weekends. i have a girlfriend in minneapolis so occasionally I commute there for the weekend. so i'd need to know in advance

Austin (16:22:52): might be easier if we filled out a google doc with availability, pc specs, and etc

Austin (16:35:04): format for milestone 1 on github is what were doing

Austin (16:35:14): should have everything rdy to go on the 8th

Austin (16:35:34): format is on github repo for milestone 1

Austin (16:47:29): with appropriate gantt charts and 7 other things that go in there

Austin (16:47:54): we need to get it roughed out by tuesday

Austin (16:48:06): all the work needs to be done on github

Monday, 29 January 2018

Shawn W (03:33:23): Basic Gantt Chart is now on the Drive. Image will be saved to GitHub after it's finalized, but main work should be done outside of GH to avoid unnecessary bloat.

Shawn W (03:36:00): GitHub Repo: <https://github.com/swares985/CYBR4580-Project2501.git>

Austin (09:25:44): anyone want to get together soon

Parshav (09:28:34): I have some time today after noon, I can swing by pki.

Shawn W (09:49:16): I can do after 1.

Parshav (10:52:05): Does 2pm work?

Ian Kelly (12:10:27): I don't have much time today but what did we want to meet about I can give input through the phone

Parshav (13:13:08): I'm still down to meet at 2pm if others are joining in, we can update the GroupMe with whatever comes out. Primarily want to discuss more about the project and specifics of what need to be done.

Parshav (13:33:33): Is it a no go for the meeting? I guess we can group chat here at a certain time instead.

Tuesday, 30 January 2018

Ian Kelly (09:55:37): So what do we want to do today?

Austin (12:51:11): we got an email telling us not to come to class

Austin (12:51:14): lol

Austin (12:51:51): we should meet up this week and get proposal done, its superbowl weekend

Ian Kelly (12:58:05): Ya that is what I was referring to just wondering if we wanted to meet anyway or wait till Thursday

Austin (13:02:14): i am down

Austin (13:02:31): for whatever

Austin (13:02:46): if we meet today tho we should actually get a room and work on it

Parshav (13:15:23): Yeah I'm down to meet today as well, I'll come by pki if we do settle on meeting today.

Mohammed (13:19:54): I'm down for today or Thursday.

Ian Kelly (13:21:48): I imagine we will still have class on Thursday so that may work better but I'm down for either day

Parshav (14:47:46): So, 4 are ready to meet today. Should we ? I don't mind posting updates on slack or here after.

Ian Kelly (14:55:30): I would say hold.off we're in a find spot now and idk how much we would.gain from meeting

Shawn W (14:58:05): I'm fine with waiting to meet till Thursday. There should be a VM image on Drive for people to download if they want. It's got the Oracle JVM and Git installed on an Ubuntu box. If everyone could clone the Git repo from the link I shared and add/commit/push a text document with their computer specs and a rough idea of their schedules for working on the projects I can finish throwing together the Gantt Chart. Once that's finished it's mostly writing paragraphs.

Parshav (15:11:22): Sounds good!

Sunday, 04 February 2018

Yaqoob (21:20:15): Hello guys\nFor the first milestone I have to do the executive summary and what else?

Monday, 05 February 2018

Shawn W (14:08:27): @Ian Kelly I believe Yaqoob was working with you on various documents. Apologies I've been down for the count with the Flu.

Ian Kelly (14:10:33): I've done the goals and merit

Yaqoob (14:16:05): What parts should I do?

Ian Kelly (19:13:02): @Yaqoob Try to fill out project methodology and necessary resources

Yaqoob (19:18:06): Sounds good

Tuesday, 06 February 2018

Shawn W (15:24:45): Created new poll 'Shall we attend class today as a quick catchup on progress?': <https://s.groupme.com/8CCS4g>

GroupMe (15:37:16): Poll 'Shall we attend class today as a quick catchup on progress?' is about to expire

Ian Kelly (15:47:01): Hmmmmm

GroupMe (15:47:05): Poll 'Shall we attend class today as a quick catchup on progress?' has expired

Austin (15:47:08): lol

Ian Kelly (15:47:16): Well I can change my vote to no if that helps

Austin (15:48:47): ill vote no too i just did that cause i already showed up

Shawn W (15:53:46): Lol. Well. I'm here I just wanted to know if anyone else would be.

Austin (15:54:56): I just took off

Austin (15:55:21): lol

Yaqoob (20:23:01): Hey guys \nI did not receive any invitation for the GitHub

Shawn W (20:31:57): There isn't any invitation. Go to the link I sent earlier in the chat, and pull the repository to your local Git installation.

Yaqoob (20:34:16): I did not get any link as I told you guys previously that I'm having problem with sending and receiving messages via GroupMe app

Shawn W (20:42:54): <https://github.com/swares985/CYBR4580-Project2501.git>

Shawn W (21:18:01): @Ian Kelly I've added you as a collaborator on the project. You should be able to merge and push without my approval now. Sorry I didn't realize Git would be stupid about it.

Wednesday, 07 February 2018

Yaqoob (10:19:49): Hey Guys \n\nIs the Milestone #1 due tomorrow or Feb 13th?

Ian Kelly (10:24:50): Tomorrow

Yaqoob (11:30:24): Is it okay if I complete my parts little late?

Shawn W (11:32:00): Define "little late."

Yaqoob (11:36:22): In the assignment sheet it says: Due on Thursday February the 8th so that they can be sent in by the 9th.

Shawn W (11:58:30): Yes, sent in by the 9th to the outside vendors and customers. Our work is still due on the 8th.

Thursday, 08 February 2018

Shawn W (11:48:25): How're we looking guys? Anything need to be polished or reviewed?

Ian Kelly (11:50:56): Well if we could just look at my sections and make sure they are alright

Ian Kelly (11:51:43): Also I wanted to add some statistics of %of enterprises that still use Java 6 if possible into the merit section

Ian Kelly (11:51:56): If not we could reword that line

Yaqoob (11:59:11): I'm trying to post my parts to the read me file in the GitHub but I don't know why they aren't there yet.

Parshav (13:13:13): ^ could that be another collaborator issue?

Shawn W (13:37:05): No, I have no record of Yaqoob creating a fork or making a pull request on the repository. @Yaqoob , how are you attempting to post?

Yaqoob (13:52:24): Check now

Yaqoob (13:57:19): None

Shawn W (15:00:46): Yep. Merged it in.

Parshav (15:01:04): Heads up im going be slightly late due to work stuff but I'll be in.

Austin (15:11:04): Thanks for letting us know adv

Shawn W (16:03:34): Submitted it at 3:58 PM.

Parshav (16:04:39): Rip

Sunday, 11 February 2018

Austin (19:59:45): i have the flu now guys, i got a doctors note so i bet we can persuade mahoney to push us to thursday

Tuesday, 13 February 2018

Austin (13:52:53): None

Austin (13:53:37): unable to contribute im ded

Shawn W (15:25:45): Did you forward that to him?

Shawn W (15:29:20): Also has he told us where we're meeting yet?

Ian Kelly (15:30:01): I'm gonna guess in the fishbowl

Austin (15:32:52): yes

Parshav (15:40:13): I'm gonna be running in a little late again, sorry!

Yaqoob Al Farsi (15:44:41): Has anyone of you check the grades on Canvas?

Shawn W (15:47:28): Yes I have.

Shawn W (15:47:33): 49/100.

Wednesday, 14 February 2018

Austin (19:54:56): any update on what i missed?

Ian Kelly (19:55:24): We missed a section on milestone one

Ian Kelly (19:55:51): So we need to do it and resubmit it. It's over any existing literature on the subject

Austin (20:16:28): ill work on it tonight, idk if anyone else it

Austin (20:16:30): is

Ian Kelly (20:21:32): I'm getting a little bit done by tomorrow

Ian Kelly (20:21:56): Just whatever literature you review post.it in here so we don't review the same stuff

Austin (20:22:16): not like 49/100 is a death sentence either but im glad hes letting us resubmit

Austin (20:22:27): im not going to start until after midnight

Parshav (20:33:03): I'm gonna work on it tomorrow evening.

Thursday, 15 February 2018

Austin (16:12:19): still having issues with the flu, but im almost better. i thought id be able to make it in today, but i had an issue also don't want to spread... im workin on lit sect, ill release mine very soon...

Friday, 16 February 2018

Ian Kelly (01:12:08): Just proposed a couple of paragraphs of literature review to the readme file

Tuesday, 20 February 2018

Shawn W (13:34:35): Created new poll 'Should we meet for class today, February 20, 2018?': <https://s.groupme.com/23q8ERL>

Ian Kelly (13:54:17): Looks like I'll be heading home\nAfter this class then

Shawn W (13:56:00): I'm certainly not going to complain about it. Does anyone have more to add to the Lit Review today? I want Mahoney to have something to look at today.

Thursday, 22 February 2018

Ian Kelly (12:41:44): So lads apparently it's supposed to start icing around 5

Shawn W (13:04:40): Ok...

Ian Kelly (13:10:56): I was just gonna say if I could leave a little early after I wanna try and get home before it but I guess it depends on what we all need to talk about

Parshav (13:24:13): Would it be possible to discuss what we need to do, here instead?

Ian Kelly (13:31:37): Hmm probably not

Parshav (13:35:05): @Shawn W do you have any suggestions on what to do on dev work? Have a relatively free weekend so I can start on some work.

Shawn W (13:46:22): Research java EJB and JAXRS applications. We need one to test properly.

Parshav (13:47:23): I'll see what I can do and will update with whatever on Sunday. Thanks!

Parshav (13:49:26): I'm most likely not attending today's class, interview at 3 and highly unlikely that I'll be out and back in pki on time. If @Austin is also working on dev, I'll chat with him about this stuff.

Austin (13:54:42): i am, hit me up, most of the configuration tutorials for garbage collection is for optimization

Austin (13:56:35): i also did write some lit but i did a bad job because i just covered oracle documentation then got distracted lol

Ian Kelly (14:20:40): Looks like campus is closing at 3 anyway

Austin (14:29:39): you serious

Austin (14:29:56): i never got the text

Shawn W (14:29:59): Yeup they posted it.

Shawn W (14:30:21): <https://www.unomaha.edu/alerts/index.php>

Austin (14:30:46): you guys get texts still?

Shawn W (14:30:53): Yep

Tuesday, 27 February 2018

Yaqoob (09:57:44): Are we going to meet today?

Ian Kelly (10:13:59): I would say yes

Austin (10:27:15): yes we should definitely meet

Parshav (10:28:19): +1 to that.

Austin (10:29:40): Its beautiful outside anyways

Yaqoob (10:31:20): That sounds good

Austin (15:55:49): i am not giing to be able to make it now apologies. whatever the group decides lmk

Parshav (16:00:25): I'll be coming in a couple minutes late

Wednesday, 28 February 2018

Yaqoob (22:09:04): Grades are updated in canvas but we still got 55.88% for milestone one

Shawn W (22:50:02): He provided feedback as well. The missing chunk is the Project Methodology which is a whopping 30%. Officially it should contain the User Stories that Dr. Hale wants. Unofficially can you guys put in there a few paragraphs about the tools you'll use? Also can you actually provide links in the Literature Review? I wanted to go look at them since it sounds interesting. It really says \u201cwe're going to use mercurial\u201d and that's about it. \n

Thursday, 01 March 2018

Yaqoob (12:42:43): Are we going to have a class or meeting today?

Shawn W (12:46:53): Well. I'm guessing Austin won't be here. And I won't be there. So I would say don't worry about it today.

Austin (19:19:03): does anyone want to get together this weekend

Parshav (19:54:48): I can, does Saturday around noon work?

Austin (19:55:40): yeah lets shoot for it and get something tangible

Austin (19:55:55): anyone else can come

Ian Kelly (19:57:17): I'm sorry I won't have anytime this weekend

Mohammed (19:58:34): I don't have time this weekend either sorry

Tuesday, 06 March 2018

Yaqoob (14:41:59): Are we going to meet today?

Austin (14:53:30): not sure what do you think? i'm working on it right now anyways.\n\nusing mutable data type, char array to store a password, then just overwriting the array when i'm done with it and replacing the sensitive data. but it doesn't work if the jvm moves(copies) the data in memory, because it just leaves the old data and makes a pointer to a new area in memory with the copy. trying to make that scenario

Austin (14:59:30): is anyone going to meet today?

Ian Kelly (15:00:04): I'm here so I'm down for meeting it's up to y'all

Shawn W (15:00:38): We're going to meet today. Mahoney wants to go over our milestone 1 materials with us and I want to see everyone's progress with their assigned pieces.

Austin (15:01:20): sounds good

Shawn W (15:19:01): @Ian Kelly If you're there can you grab us a table not at the back middle of the room so maybe we can talk with Mahoney before 5 o'clock?

Ian Kelly (15:19:59): Secured

Austin (15:22:19): nice

Austin (15:26:37): good call

Shawn W (15:28:29): Thanks Ian. @Parshav @Mohammed Can you both look over the GitHub repo before class? If Mahoney asks some questions I'd like for each of you to feel comfortable providing input.

Shawn W (15:29:57): Btw our Milestone 1 grade changed.

Ian Kelly (15:30:09): Ya it's alot better now haha

Parshav (15:38:35): Sure thing. Im going to push some stuff up to the repo in a bit, might be in a couple minutes late.

Tuesday, 13 March 2018

Yaqoob (09:17:55): Good morning guys \n\nCould you please tell me exactly what parts I have to do for the milestone 2 because I'm really confused and I'm trying to work on it now.

Shawn W (09:42:28): @Yaqoob Talk with @Ian Kelly. You'll be working with him on any research documentation.

Ian Kelly (10:33:07): Me and yaqoob just talked, also I will be unable to make it tonight please let me know if you have any additional questions

Shawn W (11:50:27): I just spoke with Bill. He's going to spend a majority of today with Track one teams, so we don't have to go if it won't be worthwhile.

Austin (19:04:40): 13 days away boys

Shawn W (20:10:37): ...?

Austin (20:11:13): he just added the milestone 2 asgnment

Thursday, 15 March 2018

Yaqoob (10:40:57): Good morning guys \n\nI don't feel good due to the bad flu that I am experiencing since yesterday and I will not be able to attend today's meeting.\n\nThank you

Austin (10:41:15): no way you got it too

Austin (10:42:06): i was going to see if you wanted to meet up after this weekend and aggregate, lmk how ur doing sunday

Austin (10:42:36): hope you feel better

Yaqoob (10:42:55): I think it's because of the wether changing for the spring season

Yaqoob (10:43:10): Weather**

Austin (10:43:43): alright

Austin (10:43:48): i have a midterm today anyways

Yaqoob (10:44:06): Good luck in your exam

Shawn W (12:01:10): Alright y'all no meeting today. But we're meeting at least once during spring break. Seeing as Milestone two is due when we come back.

Ian Kelly (12:07:17): Gucci but heads up I will be out of town the 22nd to the 26th

Thursday, 22 March 2018

Austin (02:12:15): Yaqoob, you free this weekend?

Austin (02:12:27): Feeling better?

Yaqoob (10:32:32): Hey Austin\n\nYeah, I feel good now. I'm out of town these days. By the way I'm working with Ian for the milestone 2.

Monday, 26 March 2018

Shawn W (14:55:33): @Austin I need you to go on GitHub and, under the Projects tab for the repo, assign yourself to the card for "develop test application for heap." @Parshav \xa0if you'd take "Research/Find/Develop heap and GC analyzer," and @Ian Kelly \xa0or @Yaqoob \xa0if you'd assign yourself to, "Research Java GC techniques..." Milestone 2 is due at 11:59 tonight, and from the history on that project, no one has done anything.

Yaqoob (14:56:55): Hey Shawn \nDid you get my email?

Shawn W (15:00:18): @Yaqoob I see it now.\xa0 Are you comfortable adding files to the GitHub repo?

Mohammed (15:00:59): Hey @Shawn W I'm in touch with @Parshav and we meet once in spring break. We worked over some codes. Thanks

Yaqoob (15:03:38): @Shawn W I'm little confused about adding files to the GitHub repo but I will try it. You want me to add that word file to the GitHub repo?

Shawn W (15:21:05): @Yaqoob Yes, please. Let me know if you can't decide where it should be put in the project folders. @Mohammed Glad to hear. Can you guys take what you have and put it in GitHub? Having a repository for our project doesn't do us much good if we keep all our stuff on our personal computers and never put it in the repository. Lol

Yaqoob (18:28:08): @Shawn W Under What folder should I put the on the GitHub?

Parshav (19:53:30): I put up mine and yaqoobs work under milestone_2 folder in src, edited cards accordingly.

Shawn W (20:23:34): Sweet. Thanks @Parshav. Sorry @Yaqoob I was at a family dinner.

Yaqoob (20:26:26): @Shawn W I am not able to add files on the GitHub repo and also I am not able to assigned myself to the mentioned ticket so I asked Parshav to do that for me. Could you please check what is wrong with my account? Maybe you didn't give me the permission to do so.

Shawn W (22:39:23): Go ahead and check when you get a chance. It should allow you to now.

Ian Kelly (23:42:02): I created a pull request with What i have completed for the Milestone 2 doc.

Ian Kelly (23:42:14): it seems as of right now we will be late on this mileston

Tuesday, 27 March 2018

Shawn W (11:28:09): Ok. Well we have until 4. I'll look into it and add what I can.

Austin (12:42:28): trying to push my testers to the repo

Austin (12:42:43): how to I gain write access

Austin (12:43:15): and is there anything I can work on in the meantime to help the milestone

Shawn W (12:45:06): Add your files (I believe git add), Commit, then push.

Austin (13:04:01): Can't connect to any URI: : git-receive-pack not permitted on \nI think I don't have permissions

Austin (13:05:41): i'm using egit, i'll try command line

Shawn W (13:06:40): Cool. Lemme know.

Austin (13:10:51): can you add austinesmith aesmith@unomaha.edu as contributor?

Austin (13:30:01): it worked when i recloned and pushed with command line, weird but it's in there. anything you need help with atm shawn

Austin (13:31:36): working on outcome 2

Shawn W (13:35:10): Weird. Thanks for adding stuff.

Shawn W (13:51:25): Invited you to collaborate. You'll probably get a link in your email to confirm.

Parshav (14:09:52): Hey, I won't make it to class today, car in garage still and not doing great from last nights food. Sorry!

Austin (15:13:23): outcome two's findings have been updated on the milestone 2 md!

Shawn W (15:13:44): It let you push?

Austin (15:14:54): yep you can read it on the github page

Shawn W (15:15:10): You pushed to a fork. You need to pull it into the master branch.

Austin (15:16:01): the outcome two findings markup page? or the java tester classes?

Austin (15:21:07): damn

Shawn W (15:28:58): I merged it.

Wednesday, 28 March 2018

Parshav (16:46:06): @Shawn W do I need to prepare the same topic I did for milestone 2, for the presentation?

Shawn W (17:51:34): Yes, please. How's everyone else coming along?

Mohammed (18:52:56): @Shawn W Can we present on Tuesday because he said we will have Thursday and Tuesday for presentations, and I have test tomorrow I'm preparing for the test if its fine with you guys?

Thursday, 29 March 2018

Shawn W (12:57:41): @Mohammed @Ian Kelly @Austin @Parshav @Yaqoob No. We will be ready to present today. Whether we go or not is not up to me, it will be randomized by Dr. Mahoney at the start of class. No one has added anything to the presentation shared with you all. We have 3 hours.

Austin (12:58:05): yep working on it

Austin (12:58:31): probably gonna put all mine in at once cause gathering screenshots etc

Shawn W (12:58:49): Where are you rn? Can people meet up to work on this together?

Austin (12:59:20): i always use my desktop for development stuff lol

Shawn W (12:59:55): I can understand and sympathize. It's hard to use a laptop screen vs dual 4k monitors. Lol

Shawn W (13:04:49): I've just sent the link to the presentation to all of your emails. Please check that you can access.

Yaqoob (13:19:59): Can we just email Dr. Mahoney and ask him to let us present on Tuesday because I'm not ready yet.

Shawn W (13:40:18): No. We've had weeks to work on our materials. I understand the anxiety but Dr. Mahoney will not be infinitely lenient with our group. What part are you not ready for?

Parshav (14:08:45): Anyone at pki working on this? I'll be there in 5 mins if we want to discuss.

Shawn W (15:40:18): Status update guys. Where are we at?

Parshav (15:44:50): 15 slides on the presentation

Parshav (15:45:00): In total that is.

Shawn W (15:50:52): How many with content?

Parshav (15:53:23): Out of the 19 now, at least all of them have stuff on it, I got one with just images but will talk on it.

Austin (15:53:27): im done and On my way! to class

Austin (15:53:47): but will be a tad late to class

Austin (16:04:29): my part is done but I could not find my car keys so stall for a minute lol

Monday, 02 April 2018

Yaqoob (17:58:26): Do I need to add slides to the presentation to talk about my part?

Austin (17:58:54): i would

Austin (17:59:15): everyone talked on top of slides

Shawn W (17:59:28): Yes please.

Yaqoob (18:09:14): @Ian Kelly Are you talking about the same topic as me?

Yaqoob (18:22:02): I see that Ian is covering everything so I don't think there is a need to add more slides about the topic

Tuesday, 03 April 2018

Shawn W (09:34:01): Alright guys. Status check. What still needs to be finished and prepared for presenting today?

Parshav (09:34:40): I got to clean up my slides towards the end.

Shawn W (14:28:04): Alright group! 30 minute warning! At 1500 I'm exporting the presentation to PowerPoint format and adding it to the GitHub repository. Make sure any desired changes and additions are in by 3:00 PM today!

Shawn W (15:26:16): PowerPoint is in the repo. Good work all! I dunno when we present today. He'll probably do a random list again. But we should be ready!

Parshav (15:53:41): I'm running 5-6 minutes late , if we go first I can make it just in time for my part. Sorry!

Ian Kelly (16:06:47): @Austin where ya at

Ian Kelly (16:12:40): @Parshav you almost here?

Parshav (16:13:29): Climbing stairs

Shawn W (16:14:35): @Austin You are now very late. ETA?

Thursday, 05 April 2018

Parshav (11:46:38): Are we meeting today?

Shawn W (11:53:21): I'm gonna go with no. Mahoney isn't expecting anyone to be there. Be sure you all fill out the survey for Milestone 2! The link is posted in slack.

Tuesday, 10 April 2018

Parshav (14:11:37): Are we meeting today?

Shawn W (15:38:53): Imma go with no. We can catch up on Thursday. Enjoy the weather for today!

Wednesday, 11 April 2018

Yaqoob (17:42:31): Hey guys\n\nI saw that we got 190 out of 270 in milestone 2

Shawn W (18:08:09): Well it's a good thing we're going to be there Thursday to discuss it with him! Still a much better grade than we got the first time in Milestone 1.

Mohammed (18:15:04): To all I rated everyone high score but some of you didn't rated that the same because of what? \nThis is unfair!!\n if you have something personal, and you don't like me that's something different.

Thursday, 12 April 2018

Parshav (15:59:26): You guys know if it's in the classroom today or in 158?

Yaqoob (16:02:14): I'm in 158

Ian Kelly (16:02:32): I'm in the fishbowl currently

Austin (16:03:45): I'm in traffic

Parshav (16:04:29): I'm in the classroom, should I come down ? There are a couple other people from class in here. \n

Yaqoob (16:05:05): Wait there so if the teacher come there let us know

Ian Kelly (16:05:12): There's only a couple of people from class here is Mahoney there?

Ian Kelly (16:05:30): Ahh alright I'll let ya know if he comes

Parshav (16:05:34): No he did say he'd be a little late

Parshav (16:05:37): Yea that works

Ian Kelly (16:09:21): Hes down here in the fishbowl

Parshav (16:09:31): Omw

Austin (19:08:55): are you alright @Shawn W

Tuesday, 17 April 2018

Yaqoob (09:30:59): Are we going to meet today?

Shawn W (10:19:22): Yessir.

Friday, 20 April 2018

Yaqoob (12:58:22): Hey guys \n\nWhat about milestone 3 and final presentation ?

Monday, 23 April 2018

Austin (13:43:37): we have a bit of time but we should start this week

Austin (23:36:09): wait we just got an email about starting presentations on tuesday

Austin (23:36:54): no date he just says tuesday lol

Austin (23:42:03): im looking at the syllabus and i believe final reports are due

Austin (23:53:01): i think milestone 3 is due tomorrow

Austin (23:53:05): which is cool i guess

Mohammed (23:55:12): It's due on Thursday May 3rd

Mohammed (23:55:28): :)

Austin (23:55:39): i think thats a mistake look at his recent email

Austin (23:55:49): well i emailed him

Austin (23:56:55): you might be right doe cause that would make more sense

Austin (23:57:45): i might just contribute now anyways

Tuesday, 24 April 2018

Parshav (12:34:01): Are we meeting today?

Austin (12:34:21): im not

Austin (12:35:04): my car has 5 flat tires

Parshav (12:38:05): 5 ? What happened

Austin (12:39:11): nothin nothin; just gettin oil change, checkup, new tires,

Yaqoob (12:41:12): We must meet for today as there is no time left for the semester and we still did not start working on the milestone 3. I just want to pass this class and continue my life.

Austin (12:41:37): what do u mean

- Austin (12:41:54):** its not due today
- Austin (12:42:15):** i cant find a definitive answer on this tho lmao
- Shawn W (12:42:43):** Its not due till next week. We will be giving presentations next week during our scheduled final exam time.
- Shawn W (12:42:48):** He posted an announcement on Canvas.
- Yaqoob (12:42:57):** Although it's not due today we still have to finish milestone 3 on time
- Shawn W (12:43:01):** However, Yaqoob is right. We are dangerously underprepared for this milestone.
- Shawn W (12:44:13):** I want everyone here today to discuss where we're at.
- Shawn W (12:44:37):** If you can't be physically present, you will be available through a conference phone call.
- Shawn W (12:45:01):** I want everyone to be talking today. Where are we at, what still needs to be done, who's responsible, and I want actual dates.
- Shawn W (12:45:32):** We talked about this a week ago. How are people progressing. I notice little to no updates on the Github repo even though the point of the repo is to be constantly up to date with others.
- Shawn W (12:46:00):** Communication in this team has been lax, if present. I take the majority of the blame for that, as I'm supposed to be the one pushing for everyone to communicate.
- Shawn W (12:46:16):** But it has led to each member being almost unaware of what anyone else has done or is doing.
- Shawn W (12:46:47):** We cannot be late on this last milestone and we can't expect a chance to fix anything after the due date. There is no slack space for this one. It's done on that date or we fail. Period.
- Shawn W (12:51:02):** @Austin I'll get you a phone # to call right before class time. Make sure you're somewhere you'll be able to chat and hear us. Will anyone else not be able to meet at PKI today?
- Austin (12:51:48):** alright
- Austin (12:52:09):** class is cancelled so you guys can meet wherevr
- Shawn W (12:53:02):** Formally, yes, class is cancelled. But we are still meeting. I will be in the classroom (243, I believe) by 4 o'clock.
- Shawn W (16:06:55):** @Austin Are you available?
- Austin (16:07:12):** 402 917 3449
- Ian Kelly (18:25:16):** I added two new files to the repo. Milestone-3.md and finalreport.md. @Mohammed and @Yaqoob the items you need to complete are on the final report markdown file

Thursday, 26 April 2018

Shawn W (11:19:39): Thanks @Ian Kelly. Everyone, where we at? Status updates!

Yaqoob (11:57:59): I'm on track with my part

Shawn W (14:44:34): Do we need to meet today?

Yaqoob (14:45:16): I'm good

Austin (21:22:03): i am willing to meet up at any point now

Friday, 27 April 2018

Shawn W (05:25:48): Alright. Is anyone free to meet this weekend?

Yaqoob (19:55:03): None

Yaqoob (19:55:35): He uploaded the schedule for presentations to canvas

Yaqoob (23:04:11): @Ian Kelly What points you want me to cover for project Goals and project Methodology?

Ian Kelly (23:15:51): Pretty much we wanna take what we had from milestone 1 and update them with what we accomplished and what we couldn't accomplished and why for the goals.

Ian Kelly (23:17:51): For methodology we wanna take it from milestone 1/2 as well and try to update it with any recent methodology @Yaqoob

Yaqoob (23:19:58): You want me to write summaries ?

Ian Kelly (23:23:24): No we need to reuse stuff from milestone one and two and expand on it

Yaqoob (23:28:13): Okay

Austin (23:46:27): i am okay to meet whenever

Shawn W (23:55:40): Alright. Good effort on the communication guys. Austin, are you looking to meet with anyone in particular?

Austin (23:56:36): parshav

Austin (23:56:51): or the group if its meeting

Mohammed (23:58:08): I'm down whenever

Shawn W (23:59:03): @Parshav We're talking to you!

Shawn W (23:59:41): I've got a fairly low key weekend so I could meet tomorrow or Sunday.

Saturday, 28 April 2018

Mohammed (00:00:06): Sunday will be great

Austin (17:40:53): sunday

Austin (17:41:07): @Parshav Sunday?

Austin (17:41:27): lets get this out of the way im tired of worrying about it

Parshav (22:52:14): Okay just looking at these messages, super sorry for some reason I was getting no notifications at all for GroupMe. I have been working and wil push stuff tonight/tomorrow morning. I

can call in but cant make it to school cause I'm pretty packed. I'll try and chat this through with Austin. sorry for the inconvenience!

Sunday, 29 April 2018

Parshav (09:46:34): I've pushed my stuff and merged into master, all under sec/milestone3. I'm going to work with @Austin to build more on these and generate some results.

Parshav (09:47:50): Had to copy the files off the VM so they're all under one commit. I'm going to implement the gc analyzing stuff on whatever me and Austin work on today and will probably have to discuss where to take it from there.

Shawn W (09:48:24): Awesome. Keep us updated.

Ian Kelly (09:51:46): I also pushed updates to the milestone three file, the overview and hinderencies .

Shawn W (09:52:35): Sweet. Take a quick look at the new stuff from Parshav if you get a chance. Maybe something worth a screenshot for aesthetics?

Shawn W (09:52:57): Yes @Parshav I'm saying your code is pretty enough to screenshot. Lol

Parshav (09:55:02): \U0001f602 lol. I'll grab some screens from the gc analyzing as well, that'll be graphs and heap info from the eclipse tool I've been using.

Shawn W (10:25:10): Sweet. Graphs always make it look like you put a lot more effort into something lmao

Yaqoob (16:31:20): I'm going to push my stuff tonight or tomorrow morning, I supposed to finish my part yesterday night but things went wrong.

Monday, 30 April 2018

Yaqoob (02:40:36): @Ian Kelly I reviewed all the work from milestone 1 and 2 but there wasn't much to add to the project methodology and project goals. Please check my work on GitHub and let me know if you want me to change any thing.

Parshav (08:23:51): I will update after my comp arch final at noon.

Parshav (08:24:06): Good luck to whoever else is in that \U0001f62c

Shawn W (10:01:53): Oh hey. Suicide pact?

Yaqoob (10:33:44): What about the presentation for tomorrow ?

Austin (13:07:13): just a heads up im working right now! will see pushes

Parshav (17:20:41): I've been, and still continue to work on getting a "this should not be in the memory this long" result with some visual proof. Might be quiet for a bit till next update.

Yaqoob (17:55:35): What about presentation PowerPoint ?

Parshav (18:12:26): Same as last time where everyone puts in their own parts? That should be started by now.

Yaqoob (18:58:37): @Shawn W

Parshav (20:03:22): Looks like he's a bit busy. We should start on the presentation tho, I don't think any of us want to rush it tomorrow again.

Parshav (20:08:55): Nm just checked my mail. \U0001f44d\U0001f3fe Presentation link is up but it's empty rn.

Shawn W (20:21:08): I'm alive I promise. Just working on a couple online finals. @Ian Kelly Do you have any time tonight?

Ian Kelly (20:40:12): Ya I'm here now

Yaqoob (21:22:17): @Austin Are you alive?

Parshav (21:51:45): "Final" program is almost complete, I made a diagram to discuss it, and have outputs regarding memory dumps at different stages, and a couple more things which will be too much to explain. I'll push the stuff in a bit but it's still WIP. There's just one major task I need to grab a result for, other than that I'm good on my end.

Parshav (21:52:44): Do we go through all the milestones tomorrow and present our whole project or just milestone 3?

Ian Kelly (21:55:22): Our presentation should cover:\nHigh level goals\nProject methodology overview\nProject findings\nAnd any demos of codes and such

Ian Kelly (21:55:50): So I would say mostly milestone three with a little bit of the other milestones sprinkled in

Shawn W (21:57:21): What Ian said. This is the big one. The grand finale. We sorta summarize what we were looking to do and a majority of the time is on results/findings and their significance.

Parshav (22:11:49): Awesome.

Tuesday, 01 May 2018

Parshav (00:41:31): Pushed another project "Instance One" on GitHub, maybe add more tomorrow but is good for now. Will be pulling most of our findings from this project. Moving forward to work on the dev seide of the presentation.

Ian Kelly (00:48:06): I put up our goals and project methodology up on the presentation. Please take a look at it and make any changes you see fit

Ian Kelly (00:48:27): We still need our results and any code examples we want to present

Parshav (00:52:01): Yea I'm trying to figure a way to word it well and make it look like we worked more than just the last week \U0001f62c

Austin (01:04:37): don't say that in the group message lol

Parshav (01:05:12): rip

Austin (01:58:46): i redid the intro slide in photoshop

Parshav (02:09:46): Dam it looks pretty neat \U0001f44c\U0001f3fe

Parshav (02:28:36): Added dev related slides and some code screenshots. Will add another slide or two to the dev stuff cause Ive left stuff out. Shawn I don't have material on using the tomcat server you setup unfortunately but at this point if we can add something in about it it could be helpful.

Parshav (02:29:53): Other than that, can you also possibly take a look at the results slide and word it better? I'm tired af and can't think of anything rn.

Parshav (02:34:23): I will have limited availability due to work till about 12 but will try and work on the presentation, in case I don't reply tomorrow morning.

Austin (02:45:09): gj parshav gold star for you my friend get some sleep

Yaqoob (03:50:13): Guy, I'm reviewing the presentation slides now and I notice that my name was written wrong

Austin (03:50:41): \U0001f611

Austin (03:50:56): okay its all good in the hood

Yaqoob (03:51:40): My name is YAQOOB not YAQUOOB\U0001f644

Austin (03:52:58): its a cool name for sure, just not familiar with it yet my bad

Yaqoob (03:54:05): YAQOOB is Arabic version of JACOB in English

Austin (03:54:12): i will fix

Austin (03:56:55): its funny cause i always picture you as a little white dog with a watermelon on his head

Yaqoob (03:59:14): That still nice\U0001f436

Austin (04:14:27): i fixed it

Austin (04:14:39): changed it to Yaqoob

Yaqoob (04:15:45): Hahaha, I saw it Yaqoob

Shawn W (09:11:08): Alright y'all great job working last night (and apparently this morning jeez). Take your naps. What still needs completed?

Parshav (09:55:58): Refining the presentation so it doesn't seem like it was done super late. Making it look better and worded better. I'm working on adding in more but I can't take time to iterate again and make it better.

Parshav (09:57:06): And also my comment last night on the tomcat server stuff. I haven't done anything with it but if we can add something in about it, it would be super nice. You know it better than us so if you can tie that in somehow to what we've been doing.

Shawn W (09:58:26): @Parshav Can do. @Yaqoob Or @Ian Kelly Is there anything on the milestone documents you need help with?

Ian Kelly (09:59:39): @Shawn W we still need the results and findings on the documents

Ian Kelly (10:02:06): Also any instillation process that we would want to include

Shawn W (10:07:37): Alright. @Parshav Or @Austin, you have images in the slides, are they saved as PNG or BMP files somewhere so I can put them in the documents?

Parshav (10:20:58): Negative. If you can point to where in the docs they need to be added, I'll add them in myself. They are just screenshots that were automatically copied to the clipboard unfortunately.

Shawn W (10:22:23): Create a new 'm3' folder under the img/ root folder

Shawn W (10:22:38): Put them in there. PNG preferably.

Parshav (10:26:05): Will do

Shawn W (10:31:08): Sweet ty. Great job all on this last milestone. I definitely don't feel the same panic I did going into milestone 2. Did anyone want to get together before our class to practice the presentation?

Parshav (10:47:16): Im planning to be at pki by 3 to clear it up so the presentation goes smooth. @Austin @Mohammed can you guys make it then?

Shawn W (10:56:43): @Ian Kelly What about you?

Ian Kelly (10:59:56): Ill be able to make it by three

Yaqoob (11:47:49): I'm ready to meet anytime

Shawn W (12:10:34): Sweet y'all. Alright I'm updating our markdown files as we speak. Good job on the writing guys. @Parshav Are you going to be able to demonstrate any of the code or applications?

Parshav (12:25:19): Nope unfortunately I can't risk it at this point. The results are honestly still very unpredictable. I'm adding a slide or two for displaying our findings. Other than that, I can talk on the presentation about the whole dev side of things.

Shawn W (12:26:22): Alright works for me. Just pushed up some stuff. Feel free to take a look.

Parshav (12:42:08): ^ just saw the md for final. The findings in they are different that the " dev result" slide, there may be need of another slide for actual findings to match the document to the presentation

Shawn W (12:44:47): I'll update things as I go, don't worry too much. Those are mostly placeholders for now.

Parshav (12:55:32): Awesome. Am on less sleep and much coffee so stress is magnified times 5 rn lol.

Shawn W (13:05:15): Alright, @Parshav can you take a look at the final report doc and update the \u201cGetting started\u201d section with the basic steps for someone to try it out?

Shawn W (13:08:22): I should be done touching the report doc for now so feel free to edit away as you wish.

Parshav (13:18:34): Yea I'm almost done with these 3 slides I just added , will move to that and upload images as well right after.

Shawn W (13:19:00): Awesome ty.

Shawn W (13:20:21): Btw to all. I will be exporting the chat history for this group at 3 o'clock to add it to our repository. Just a heads up, nothing after 3 will be saved.

Mohammed (13:22:45): @Parshav I can make it.

Parshav (13:23:38): If we post memes will you export those as well or is that redacted as well ...

Shawn W (13:24:38): Provided the images can be sourced, I can probably export them. Did you have one in mind? Lol

Parshav (13:27:45): If we had more time if probably make one on how badly this class was structured but oh well. \U0001f62c

Parshav (13:32:11): Btw I am done on my part of the slides and am moving on to the document work.

Shawn W (13:44:08): Sweet. Ty

Yaqoob (13:48:16): I'm heading to pki now, see there guys.

Parshav (14:15:29): Added the getting started in final MD and images to img folder.

Parshav (14:15:48): I'ma take a little break and will be over at pki in an hour or so.

Yaqoob (14:21:50): @Parshav Don't sleep and miss The presentation

Parshav (14:32:59): Goodnight!

Austin (14:34:53): headed to pki as well

Yaqoob (14:52:46): My face while hoping to pass this class

Parshav (14:59:41): That's how I felt after yesterday's comp arch final.

Ian Kelly (15:00:04): That comp arch final \U0001f922

Yaqoob (15:00:46): The comp arch class was the easiest class for me

Shawn W (15:01:22): That class was draining. Where we meeting y'all?

Yaqoob (15:02:05): I'm in a room behind the cafe

Shawn W (15:06:22): Perfect. I'm with Yaqoob. Room 154F.

Parshav (15:07:08): I'm leaving my place now, should be there within 20
